

THE STATE OF ILLINOIS PERFIN (I-5)

is the product of a 10-die automated perforator and it wasn't uncommon for one of the ten dies to lose a pin. As a result, the I-5 pattern exists in a variety of varieties. We recently acquired, through Joe Frye of Memphis, our printer, nearly two full sheets of the I-5 pattern showing one broken die, the one on the extreme right (or left) of the row of 10. Three pins are missing. We've detached pairs of perfins: one each of the broken die and the regular die and we'll share them with members who send us a stamped self addressed envelope. There are only 17 pairs available with the broken die, but we'll send along additional examples of the complete perfin if you want them. Send your SASE to Floyd Walker, Box 82, Grandview, MO 64030.
